***Election/Restrictions***

1. This action is responsive to the Amendment filed March 16, 2010, in which claims 4-5 were amended, claims 1-3 and 8-49 were canceled, and claims 50-51 were added. Of the pending claims 4-7 and 50-51, claim 7 remains withdrawn, while claims 4-6 and 50-51 correspond to the subject matter of originally elected Group I. However, it is noted that in the Election/Restriction requirement of October 3, 2007, applicant was required to elect a single probe or single probe combination encompassed by Group I for examination. In response, applicant elected SEQ ID NO: 1 without traverse (see the response of November 2, 2007), and applicant has subsequently received multiple actions on the merits directed to this elected invention. The Amendment of March 16, 2010 is thus non-responsive in that it includes no claims directed to the elected invention (rather, the pending claims are each directed to various combinations that include SEQ ID NO: 1). However, as a courtesy to applicant, and because the claims each continue to recite the elected SEQ ID NO: 1, the various combinations requiring elected SEQ ID NO: 1 will be considered separate species of the elected invention for purposes of further examination. In response to this communication, Applicant should therefore elect a species in accordance with the requirement below.
2. This application contains claims directed to the following patentably distinct species: each combination of SEQ ID NO: 1 plus one of SEQ ID NOS 2-14 (as recited in claims 4-5) and the combination of SEQ ID NOS 1-14 (as set forth in claim 50). The species are independent or distinct because the claims to the different species recite the mutually exclusive characteristics of such species, particularly, each of SEQ ID NOS

2-14 and the combination thereof are each characterized by different sequences/structures and different functional characteristics. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, or a single grouping of patentably indistinct species, for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 4-5 are considered to be Markush-type generic claims.

There is a search and/or examination burden for the patentably distinct species as set forth above because at least the following reason(s) apply:

Each species requires different search strategies and queries (and the consideration of different prior references).

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or a grouping of patentably indistinct species to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected species or grouping of patentably indistinct species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.**

The election may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time

of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species or grouping of patentably indistinct species.

Should applicant traverse on the ground that the species, or groupings of patentably indistinct species from which election is required, are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing them to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

***Information Disclosure Statement***

3. The information disclosure statements filed December 30, 2009 and February 11, 2010 each fail to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because they include documents in a foreign language for which no translation and/or explanation of relevance has been provided. Accordingly, the cited foreign language documents have not been considered. However, it is noted that applicant may chose to provide such translations/explanations in response to this communication.
